DECEMBER , 2001

Reported from the Committee on Science

A BILL

To authorize funding for computer and network security research and development and research fellowship programs, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Cyber Security Re-
5 search and Development Act”.

1 **SEC. 2. FINDINGS.**

2 The Congress finds the following:

3 (1) Revolutionary advancements in computing
4 and communications technology have interconnected
5 government, commercial, scientific, and educational
6 infrastructures—including critical infrastructures for
7 electric power, natural gas and petroleum production
8 and distribution, telecommunications, transportation,
9 water supply, banking and finance, and emergency
10 and government services—in a vast, interdependent
11 physical and electronic network.

12 (2) Exponential increases in interconnectivity
13 have facilitated enhanced communications, economic
14 growth, and the delivery of services critical to the
15 public welfare, but have also increased the con-
16 sequences of temporary or prolonged failure.

17 (3) A Department of Defense Joint Task Force
18 concluded after a 1997 United States information
19 warfare exercise that the results “clearly dem-
20 onstrated our lack of preparation for a coordinated
21 cyber and physical attack on our critical military
22 and civilian infrastructure”.

23 (4) Computer security technology and systems
24 implementation lack—

25 (A) sufficient long term research funding;

1 (B) adequate coordination across Federal
2 and State government agencies and among gov-
3 ernment, academia, and industry;

4 (C) sufficient numbers of outstanding re-
5 searchers in the field; and

6 (D) market incentives for the design of
7 commercial and consumer security solutions.

8 (5) Accordingly, Federal investment in com-
9 puter and network security research and develop-
10 ment must be significantly increased to—

11 (A) improve vulnerability assessment and
12 technological and systems solutions;

13 (B) expand and improve the pool of infor-
14 mation security professionals, including re-
15 searchers, in the United States workforce; and

16 (C) better coordinate information sharing
17 and collaboration among industry, government,
18 and academic research projects.

19 **SEC. 3. DEFINITIONS.**

20 For purposes of this Act—

21 (1) the term “Director” means the Director of
22 the National Science Foundation; and

23 (2) the term “institution of higher education”
24 has the meaning given that term in section 101 of

1 the Higher Education Act of 1965 (20 U.S.C.
2 1001).
