U.S. PUBLIC DIPLOMACY

State Department and the Broadcasting Board of Governors Expand Efforts in the Middle East but Face Significant Challenges

Highlights of [GAO-04-435T](#), a testimony before the Subcommittee on National Security, Emerging Threats, and International Relations; Committee on Government Reform; House of Representatives

Why GAO Did This Study

The terrorist attacks of September 11, 2001, were a dramatic reminder of the importance of our need to cultivate a better public opinion of the United States abroad. Yet recent opinion research indicates that foreign publics, especially in countries with large Muslim populations, view the United States unfavorably. GAO issued two studies in 2003 that examined changes in U.S. public diplomacy resources and programs since September 11 within the State Department (State) and the Broadcasting Board of Governors (BBG); the U.S. government's strategies for its public diplomacy programs and how it measures their effectiveness; and the challenges that remain in executing U.S. public diplomacy efforts. Although the studies did not focus exclusively on the Middle East, they identified systemic problems that would apply to public diplomacy activities there.

GAO made several recommendations to State and the BBG to address planning and performance issues. For example, GAO recommended that State develop a strategy to integrate its public diplomacy efforts and direct them toward common measurable objectives, and that BBG revise its strategic plan to include key measurable objectives. Both agencies have made some progress toward implementing our recommendations.

What GAO Found

Since September 11, State has expanded its public diplomacy efforts in Muslim-majority countries considered to be of strategic importance in the war on terrorism. It significantly increased resources in South Asia and the Near East and launched new initiatives targeting broader, younger audiences—particularly in predominantly Muslim countries. Also since September 11, the BBG has initiated several new programs focused on attracting larger audiences in priority markets, including Radio Sawa and Arabic language television in the Middle East, the Afghanistan Radio Network, and Radio Farda in Iran.

State and BBG have increased their efforts to support the war on terrorism. However, State does not have a strategy that integrates all of its diverse public diplomacy activities and directs them toward common objectives. In addition, we found that while the BBG did have a strategic plan, the plan lacked a long-term strategic goal or related program objective to gauge the Board's success in increasing audience size, the key focus of its plan. Furthermore, there is no interagency strategy to guide State's, BBG's, and all federal agencies' communication efforts and thus ensure consistent messages to overseas audiences. In addition to strategy deficiencies, we found that State and the BBG were not systematically and comprehensively measuring progress toward the goals of reaching broader audiences and increasing publics' understanding about the United States.

In addition to weaknesses in planning and performance measurement, State and BBG face several internal challenges in carrying out their programs. Challenges at State include insufficient public diplomacy resources and a lack of officers with foreign language proficiency. The BBG also faces a number of media market, organizational, and resource challenges that may hamper its efforts to generate large audiences in priority markets.

Public Opinion of the United States in Selected Muslim-majority Countries (percent favorable view)

Countries	1999/2000	Summer 2002	Spring 2003
Morocco	77%	*	27%
Lebanon	*	35	27
Indonesia	75	61	15
Turkey	52	30	15

Mr. Chairman and Members of the Subcommittee:

I am pleased to be here today to discuss issues surrounding U.S. public diplomacy, particularly in the Middle East. The terrorist attacks of September 11, 2001, were a dramatic reminder of the importance of our need to cultivate a better public opinion of the United States abroad. Yet recent opinion research indicates that foreign publics, especially in countries with large Muslim populations, view the United States unfavorably. Last September, we reported for the House International Relations Committee on the State Department's public diplomacy efforts.¹ Earlier, in July, we issued a report for that committee on the progress that the Broadcasting Board of Governors (BBG)—the agency responsible for nonmilitary U.S. international broadcasting—has made in developing a new strategic approach aimed at reversing declining audience trends and supporting U.S. strategic objectives such as the war on terrorism.² The Department of State and the BBG share an annual budget of more than \$1 billion for public diplomacy activities. Although neither of our reports focused exclusively on the Middle East, each identified systemic problems that would apply to public diplomacy activities there.

Mr. Chairman, you asked us to discuss our conclusions and recommendations from these reports and, where possible, to cite specific examples of public diplomacy actions and issues we observed during our fieldwork in the Middle East.³ Today I will talk about (1) changes in U.S. public diplomacy resources and programs since September 11; (2) the government's strategies for its public diplomacy programs and how it measures their effectiveness; and (3) the challenges that remain in executing U.S. public diplomacy efforts. As part of our work, we surveyed top officials of public affairs sections at U.S. embassies worldwide on such issues as guidance from various State Department offices; sufficiency of budgetary, staff, and other resources; and ability to adequately measure performance.⁴ We met with cognizant State officials, individual members

³We conducted our Middle East fieldwork in Morocco and Egypt. We also conducted fieldwork in the United Kingdom.

⁴GAO surveyed 156 public affairs officers from March through May 2003, of which 118 completed their responses for a 76 percent response rate.

of the BBG, and senior members of each broadcast entity to discuss management issues. We also met with academics specializing in public diplomacy and international affairs issues, and private sector officials from U.S. public relations and opinion research firms with international operations. While several government entities conduct public diplomacy activities, my comments will focus on State's and the BBG's efforts since they were the subject of our work.⁵

Summary

Since September 11, both State and the BBG have expanded their public diplomacy efforts in Muslim-majority countries considered to be of strategic importance in the war on terrorism. In the two fiscal years since the terrorist attacks, State increased its public diplomacy funding and staffing and expanded its programs in two regions with significant Muslim populations—South Asia and the Near East. Among other efforts, State is emphasizing exchange programs targeting young and diverse audiences, including high school students. State is also expanding its American Corners program, which provides information about the United States to foreign audiences through partnerships between U.S. embassies and local institutions. In addition, since September 11, the Broadcasting Board of Governors has initiated several new programs focusing on attracting larger audiences in priority markets, including Radio Sawa in the Middle East; the Afghanistan Radio Network; and Radio Farda in Iran. Estimated start-up and recurring costs for these three projects through fiscal year 2003 totaled about \$116 million. The Board is also scheduled to launch an Arabic language television network in the Middle East in mid-February 2004.

Although State and BBG have increased their efforts to support the war on terrorism, we reported that State had not developed a comprehensive strategy that integrates all of its diverse public diplomacy activities and directs them toward common objectives, and that neither State nor the BBG has focused on measuring progress toward long-term goals. The absence of an integrated strategy may hinder State's ability to channel its multifaceted programs toward concrete and measurable progress. In comparison, the Broadcasting Board of Governors in July 2001 initiated a 5-year strategic approach to international broadcasting known as "Marrying the Mission to the Market," which emphasizes the need to reach

⁵We conducted our work in accordance with generally accepted government auditing standards.

large audiences by applying modern broadcast techniques and strategically allocating resources to focus on high-priority broadcast markets, such as the Middle East. However, the plan lacked a single goal or related program objective to gauge its success in reaching larger audiences in priority areas. While State, BBG, and other entities in the U.S. government conducting public diplomacy have different roles and missions, it is important to note that there also is no interagency public diplomacy strategy setting forth the messages and means for governmentwide communication to overseas audiences. According to State officials, without such a strategy, the risk of making communication mistakes that are damaging to U.S. public diplomacy efforts is high. In addition to strategy deficiencies, we found that State and the BBG were not systematically and comprehensively measuring progress toward the goals of reaching broader audiences and increasing publics' understanding about the United States. Since our reports were issued, both agencies have taken steps to address our recommendations.

In addition to weaknesses in planning and performance measurement, State and BBG face several internal challenges in carrying out their programs. According to public affairs officers at the State Department, these challenges include insufficient resources to effectively conduct public diplomacy and a lack of public diplomacy officers with foreign language proficiency. More than 40 percent of the public affairs officers we surveyed said the amount of time available to devote exclusively to executing public diplomacy tasks was insufficient, and more than 50 percent reported that the number of Foreign Service officers available to perform such tasks was inadequate. Further, about 21 percent of the officers posted overseas in language designated positions have not attained the level of language speaking proficiency required for their positions, hampering their ability to engage with foreign publics. In addition, about 58 percent of the heads of embassy public affairs sections reported that Foreign Service officers do not have adequate time for training in the skills required to effectively conduct public diplomacy. The Broadcasting Board of Governors also faces resource issues, as well as a number of media market, organizational, and resource challenges that may hamper its efforts to generate large audiences in priority markets. These challenges include outmoded programs and poor signal quality; the disparate structure of the agency, which consists of seven separate broadcast entities and a mix of federal and grantee organizations collectively managed by a part-time Board; and the resource-intensive job of broadcasting 97 language services to more than 125 broadcast markets worldwide.

We made several recommendations to the Secretary of State and the BBG to address planning and performance issues that they generally agreed to implement but progress to date has been mixed. Among other things, we recommended that State develop a strategy that considers private sector public relations techniques in integrating its public diplomacy efforts; improve performance measurement; and strengthen efforts to train Foreign Service officers in foreign languages and public diplomacy. In response to our recommendations, State is currently studying how to integrate private sector techniques into its programs. State also plans to establish a new office of strategic planning for public diplomacy. Regarding our recommendation to strengthen performance measurement efforts, State officials told us they are exploring ways to do so and State's Bureau of Educational and Cultural Affairs has, among other things, begun conducting limited pre- and post-testing of its program participants' understanding of the United States. State acknowledged the need to strengthen training of Foreign Service officers and told us that the primary obstacle to doing so is insufficient staffing to allow time for training. Officials said they have already begun to address staffing gaps by stepping up recruitment efforts as part of the Diplomatic Readiness Initiative.

In response to our recommendations to the BBG, the Board has revised its strategic plan to create a single strategic goal of maximizing impact in areas of priority U.S. interest and made audience size a key performance measure. The Board has added broadcast credibility and, according to Board officials, plans to add audience awareness and whether broadcasting entities are achieving their mandated missions. Finally, the Board recently completed a review of language service overlap that identified about \$9.7 million in potential savings. However, the Board has yet to revise its strategic plan to include details on implementation strategies, resource requirements, and project time frames for the various initiatives supporting its strategic goal of maximizing program impact.

Background

The key objectives of U.S. public diplomacy are to engage, inform, and influence overseas audiences. Public diplomacy is carried out through a wide range of programs that employ person-to-person contacts; print, broadcast, and electronic media; and other means. Traditionally, U.S. public diplomacy focused on foreign elites—current and future overseas opinion leaders, agenda-setters, and decision makers. However, the dramatic growth in global mass communications and other trends have forced a rethinking of this approach, and State has begun to consider techniques for communicating with broader foreign audiences. The BBG, as the overseer of U.S. international broadcasting efforts, supports U.S.

public diplomacy's key objectives by broadcasting fair and accurate information about the United States, while maintaining its journalistic independence as a news organization. The BBG manages and oversees the Voice of America (VOA), WorldNet Television, Radio/TV Marti, Radio Free Europe/Radio Liberty, Radio Sawa, Radio Farda, the Afghanistan Radio Network, and Radio Free Asia. Radio Sawa and Radio Farda (Iran) provide regional and local news to countries in the Middle East.

Together, State and the BBG spend in excess of \$1 billion on public diplomacy programs each year. State's public diplomacy budget totaled an estimated \$628 million in fiscal year 2004. About 51 percent, or \$320 million, is slated for the Fulbright and other educational and cultural exchange programs. The remainder covers mostly salaries and expenses incurred by State and embassy officers engaged in information dissemination, media relations, cultural affairs, speaker programs, publications, and other activities. BBG's budget for fiscal year 2004 is \$546 million. This includes more than \$42 million for radio and television broadcasting to the Middle East. Since initiating the language service review process in 1999, the Board has reduced the scope of operations of more than 25 language services and reallocated about \$19.7 million in funds, with the majority redirected toward Central Asia and the Middle East, including \$8 million for Radio Farda service to Iran. Figure 1 shows the key uses of public diplomacy resources by State and the BBG.

Figure 1: Key Uses of U.S. Public Diplomacy Budget Resources for State Department and the Broadcasting Board of Governors, Fiscal Year 2003 Estimates

Source: State Department and BBG.

^aEstimate includes \$11 million for Radio Sawa.

^bEstimate includes \$3 million for Radio Farda.

More Public Diplomacy Resources Shifting to Muslim-Majority Countries

Since September 11, State has expanded its efforts in Muslim-majority countries that are considered strategically important in the war on terrorism. State significantly increased the program funding and number of Foreign Service officers in its bureaus of South Asian and Near Eastern Affairs. State has also launched a number of new initiatives targeting broader, younger audiences—particularly in predominantly Muslim countries—that include expanding exchange programs targeting citizens of Muslim countries, informing foreign publics about U.S. policies in the war on terrorism, and demonstrating that Americans and Muslims share certain values. The BBG has also targeted recent initiatives to support the war on terrorism, including Radio Sawa in the Middle East; the Afghanistan Radio Network; and the new Radio Farda service to Iran. In addition, the Board plans to further expand its presence in the Middle East

through the launch of a Middle East Television Network scheduled for launch in mid-February 2004.

State Has Increased Resources and Programs in the Middle East

Since September 11, 2001, the State Department has increased its resources and launched various new initiatives in predominantly Muslim countries. For example, while State's bureau of Europe and Eurasia still receives the largest overall share of overseas public diplomacy resources, the largest percentage increases in such resources since September 11 occurred in State's bureaus of South Asian and Near Eastern Affairs, where many countries have significant Muslim populations.⁶ Public diplomacy funding increased in South Asia from \$24 million to \$39 million and in the Near East from \$39 million to \$62 million, or by 63 and 58 percent, respectively, from fiscal year 2001 through 2003. During the same period, authorized American Foreign Service officers in South Asia increased from 27 to 31 and in the Near East from 45 to 57, or by 15 percent and 27 percent, respectively.

Furthermore, in 2002, State redirected 5 percent of its exchange resources to better support the war on terrorism and to strengthen U.S. engagement with Muslim countries. In 2003, State has continued to emphasize exchanges with Muslim countries through its Partnership for Learning Program—designed to target young and diverse audiences through academic and professional exchanges such as the Fulbright, International Visitor, and Citizen Exchange programs. According to State, under this program, 170 high school students from predominantly Islamic countries have already arrived and are living with American families and studying at local high schools. State has also carried out increased exchanges through its Middle East Partnership Initiative, which includes computer and English language training for women newly employed by the Afghan government and a program to assist women from Arab countries and elsewhere in observing and discussing the U.S. electoral process. In addition, State is expanding its American Corners program, which uses space in public libraries and other public buildings abroad to provide information about the United States. In fiscal year 2004, State is planning to establish 58 American Corners in the Middle East and South Asia. In fiscal year 2005, State plans to open 10 in Afghanistan and 15 in Iraq.

⁶These countries include Afghanistan, Algeria, Bahrain, Bangladesh, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Pakistan, Qatar, Saudi Arabia, Syria, Tunisia, United Arab Emirates, and Yemen.

State's Office of International Information Programs has also developed new initiatives to support the war on terrorism, including a print and electronic pamphlet titled *The Network of Terrorism*, distributed in 36 languages via hard copy, the Web, and media throughout the world, which documented the direct link between the September 11 perpetrators and al Qaeda; and a publication titled *Iraq: From Fear to Freedom* to inform foreign audiences of the administration's policies toward Iraq.

New BBG Initiatives Target Large Audiences in Priority Markets

Several of the BBG's new initiatives focus on reaching large audiences in priority markets and supporting the war on terrorism. The first of these programs, Radio Sawa in the Middle East, was launched in March 2002 using modern, market-tested broadcasting techniques and practices, such as the extensive use of music formats. Radio Sawa replaced the poorly performing VOA Arabic service, which had listening rates at around 2 percent of the population. According to BBG survey research, Radio Sawa is reaching 51 percent of its target audience and is ranked highest for news and news trustworthiness in Amman, Jordan. Despite such results, it remains unclear how many people Radio Sawa is actually reaching throughout the entire Middle East because audience research has been performed only in select markets. Further, the State Inspector General and the Advisory Group on Public Diplomacy for the Arab and Muslim World have raised questions about whether Radio Sawa has focused more on audience size and composition than on potential impact on attitudes in the region. The BBG has also launched the Afghanistan Radio Network and a language service to Iran called Radio Farda. Estimated costs for these three initiatives through fiscal year 2003 are about \$116 million. In addition, the Board is launching an Arabic language television network in the Middle East in mid-February 2004.

Strategy Deficiencies, Inability to Gauge Progress Toward Goals Hinder U.S. Public Diplomacy Efforts

While the growth in programs to the Muslim world marks State's recognition of the need to increase diplomatic channels to this population, State still lacks a comprehensive and commonly understood public diplomacy strategy to guide these programs. In contrast to State, the BBG has a strategic plan that focuses on a market-based approach to increasing audience size in priority markets. Furthermore, there is no interagency strategy to guide State's and all federal agencies' communication efforts and thus ensure consistent messages to overseas audiences. In addition, State and the BBG lacked adequate measures of progress toward reaching its public diplomacy goals. Since our report, State and the Board have focused on improving their performance measures.

State Does Not Have an Integrated Strategy to Guide its Operations but BBG Does

After September 11, State acknowledged the lack of, and need for, a strategy that integrates all of its diverse public diplomacy activities and directs them toward common objectives, but to date, that strategy is still in the development stage. State officials told us that such a strategy is particularly important because State's public diplomacy operation is fragmented among the various organizational entities within the agency. Public affairs officers who responded to our survey indicated that the lack of a strategy has hindered their ability to effectively execute public diplomacy efforts overseas. More than 66 percent of public affairs officers in one region reported that the quality of strategic guidance from the Office of the Undersecretary in the last year and a half (October 2001 through March 2003) was generally insufficient or very insufficient. More than 40 percent in another region reported the same. We encountered similar complaints during our overseas fieldwork. For example, in Morocco, the former public affairs officer stated that so little information had been provided from Washington on State's post-September 11 public diplomacy strategy that he had to rely on newspaper articles and guesswork to formulate his in-country public diplomacy plans.

In contrast to State's lack of strategy, BBG has introduced a market-based approach to international broadcasting that aims to generate large listening audiences in priority markets that the Board believes it must reach to effectively meet its mission. Early implementation of this strategy has focused on markets relevant to the war on terrorism, in particular the Middle East. The Board's vision is to create a flexible, multimedia, research-driven U.S. international broadcasting system that addresses the many challenges we noted in our report, including that the Board is faces a diverse organizational structure consisting of several broadcast entities with differing missions, broadcast approaches, and constituencies.

Interagency Public Diplomacy Strategy Has Not Been Established

Mr. Chairman, we believe it is especially important to emphasize as of February 4, 2004, no interagency public diplomacy strategy has been implemented that lays out the messages and means for governmentwide communication efforts to overseas audiences. The absence of an interagency strategy complicates the task of conveying consistent messages and thus achieving mutually reinforcing benefits. State officials told us that, without such a strategy, the risk of making communication mistakes that are damaging to U.S. public diplomacy efforts is high. They also said that the lack of a strategy diminishes the efficiency and effectiveness of governmentwide public diplomacy efforts.

Our overseas fieldwork in Egypt and Morocco underlined the importance of interagency coordination. Embassy officers there told us that only a very small percentage of the population was aware of the magnitude of U.S. assistance being provided to their countries. Egypt is the second largest recipient of U.S. assistance in the world, with assistance totaling more than an estimated \$1.9 billion in 2003. Assistance to Morocco totaled more than an estimated \$13 million in 2003.

Most interagency communication coordination efforts have been ad hoc in recent years. Immediately after September 11, the White House, State Department, Department of Defense, and other agencies coordinated various public diplomacy efforts on a day-to-day basis, and the White House established a number of interim coordination mechanisms. One such mechanism was the joint operation of the Coalition Information Centers in Washington, London, and Islamabad, set up during the early stages of U.S. military operations in Afghanistan in 2001. The centers were designed to provide a rapid response capability for correcting inaccurate news stories, proactively dealing with news items likely to generate negative responses overseas, and optimizing reporting of news favorable to U.S. efforts.

In January 2003, the President established a more permanent coordination mechanism, the White House Office of Global Communications, which is intended to coordinate strategic communications from the U.S. government to overseas audiences. The President also established a Strategic Communication Policy Coordinating Committee, co-chaired by the State Department and the National Security Council and to work closely with the Office of Global Communications, to ensure interagency coordination in disseminating the American message across the globe. Although it is the committee's long-term objective to develop a National Communications Strategy, according to State officials, the committee has not met since March 2003.

State Lacks Measures of Progress Toward Public Diplomacy Goals

Mr. Chairman, in addition to deficiencies in public diplomacy strategies, we found that State is not systematically and comprehensively measuring progress toward its public diplomacy goals. Its overseas performance measurement efforts focus on anecdotal evidence and program outputs, rather than gauging progress toward changing foreign publics' understanding and attitudes about the United States. Some posts judge the effectiveness of their public diplomacy efforts by simply counting the number of public diplomacy activities that occur in their host country—for example, the number of speeches given by the ambassador or the number

of news articles placed in the host-country media. While such measures shed light on the level of public diplomacy activity, they reveal little in the way of overall program effectiveness.

State currently has no reporting requirements in place to determine whether posts' performance targets are actually met. At one overseas post we visited, the post had identified polling data showing that only 22 percent of the host country's citizens had a favorable view of the United States—a figure the post used as a baseline with yearly percentage increases set as targets. However, the former public affairs officer at the post told us that he did not attempt to determine or report on whether the post had actually achieved these targets because there was no requirement to do so. Officials at the other two overseas posts we visited also cited the lack of any formal reporting requirement for following up on whether they met their annual performance targets. An official in State's Office of Strategic and Performance Planning said that they have now begun to require posts to report on whether they have met performance targets.

Furthermore, public affairs officers at U.S. embassies generally do not conduct systematic program evaluations. About 79 percent of the respondents to our survey reported that staffing at their missions was insufficient to conduct systematic program evaluations and many officers also reported that staffing at posts was insufficient to carry out the long-range monitoring required to adequately measure program effectiveness. Even if sufficient staffing were available, State would still have difficulty conducting long-range tracking of exchange participants because it lacks a database with comprehensive information on its various exchange program alumni. State had planned to begin building a new worldwide alumni database with comprehensive data linking all of its various exchange programs. However, Bureau of Educational and Cultural Affairs officials told us they had received insufficient funds to do so, and thus are seeking to improve existing information systems for individual exchange programs.

Private Sector Public Relations Tools Could Be Relevant to State's Needs

Mr. Chairman, during our audit work, we learned that private sector public relations efforts and political campaigns use sophisticated strategies to integrate complex communication efforts involving multiple players. Although State's public diplomacy efforts extend beyond the activities of public relations firms, many of the strategic tools that such firms employ are relevant to State's situation. While it is difficult to establish direct links between public diplomacy programs and results, other U.S. government agencies and the private sector have best practices for assessing information disseminating campaigns, including the need to define success

and how it should be measured. Executives from some of the largest public relations firms in the United States told us that initial strategic decisions involve establishing the scope and nature of the problem, identifying the target audience, determining the core messages, and defining both success and failure. Subsequent steps include conducting research to validate the initial decisions, testing the core messages, carrying out pre-launch activities, and developing information materials. Each of these elements contains numerous other steps that must be completed before implementing a tactical program. Further, progress must be measured continuously and tactics adjusted accordingly.

BBG Has Made Progress in Measuring Performance

In conducting our work on the BBG strategic plan, we found that the plan did not include a single goal or related program objective designed to gauge progress toward increasing audience size, even though its strategy focuses on the need to reach large audiences in priority markets. We also found that the plan lacked measurable program objectives to support its strategic goals, including a measure of broadcaster credibility. The Board has taken several steps to address the recommendations we made in our report. First, the Board created a single strategic goal to focus on the key objective of maximizing impact in areas of priority interest to the United States and made audience size a key performance measure. Second, the Board has added broadcast credibility and plans to add the additional performance measures we recommended, including audience awareness and whether broadcast entities are achieving their mandated missions.

A Number of Internal Challenges Hamper U.S. Public Diplomacy Activities

Mr. Chairman, I have discussed the expansion of U.S. public diplomacy resources to areas of the world thought to breed terrorist activities and the need for a more cohesive, integrated U.S. public diplomacy strategy with measurable indicators of progress. There are other challenges our government faces in executing successful public diplomacy activities. According to public affairs officers, these challenges include insufficient time and staffing resources to conduct public diplomacy tasks. In addition, many public affairs officers reported that the time available to attend public diplomacy training is inadequate. Furthermore, a significant number of Foreign Service officers involved in public diplomacy efforts overseas lack sufficient foreign language skills. The Board's key challenge in executing its strategy is how to generate large audiences while dealing with a number of media market, organizational, and resources issues.

Insufficient Time and Staff

More than 40 percent of the public affairs officers we surveyed reported that the amount of time they had to devote exclusively to executing public

diplomacy tasks was insufficient. During our overseas fieldwork, officers told us that, while they manage to attend U.S. and other foreign embassy receptions and functions within their host country capitals, it was particularly difficult to find time to travel outside the capitals to interact with ordinary citizens. More than 50 percent of those responding to our survey reported that the number of Foreign Service officers available to perform public diplomacy duties was inadequate. Although State increased the actual number of Americans in public diplomacy positions overseas from 414 in fiscal year 2000 to 448 in fiscal year 2002, State still had a shortfall of public diplomacy staff in 2002, based on the projected needs identified in State's 2002 overseas staffing model. In 2002, State's overseas staffing model projected the need for 512 staff in these positions; however, 64 of these positions, or 13 percent, were not filled.⁷ In addition, about 58 percent of the heads of embassy public affairs sections reported that Foreign Service officers do not have adequate time for training in the skills required to effectively conduct public diplomacy.

We reported in 2002⁸ that as part of its Diplomatic Readiness Initiative, State has launched an aggressive recruiting program to rebuild the department's total workforce. Under this initiative, State requested 1,158 new employees above attrition over the 3-year period for fiscal years 2002 through 2004, and according to State officials, the department has met its hiring goals under this initiative for fiscal years 2002 and 2003. However, it does not have numerical targets for specific skill requirements such as language proficiency or regional expertise. Although State officials are optimistic that enough new hires are being brought in to address the overall staffing shortage, there are no assurances that the recruiting efforts will result in the right people with the right skills needed to meet specific critical shortfalls.

Shortfalls in Foreign Language Skills

Insufficient foreign language skills pose another problem for many officers. As of December 31, 2002, 21 percent of the 332 Foreign Service officers filling "language-designated" public diplomacy positions overseas did not meet the foreign language speaking requirements of their

⁷State's overseas staffing model operates on a 2-year cycle. Fiscal year 2002 was the latest year for which data were available on the numbers of positions actually filled.

⁸U.S. General Accounting Office, *State Department: Staffing Shortfalls and Ineffective Assignment System Compromise Diplomatic Readiness at Hardship Posts*, [GAO-02-626](#) (Washington, D.C.: June 18, 2002).

positions.⁹ The highest percentages not meeting the requirements were in the Near East, where 30 percent of the officers did not meet the requirement. Although State had no language-designated positions for South Asia, it had eight language-preferred¹⁰ positions, none of which was filled by officers who had reading or speaking capability in those languages. It is important to note that most of the foreign languages required in these two regions are considered difficult to master, such as Arabic and Urdu. In contrast, 85 percent of the officers filling French language-designated positions and 97 percent of those filling Spanish language-designated ones met the requirements. Officers' opinions on the quality of the foreign language training they received also varied greatly by region.

Foreign Service officers posted at the overseas embassies we visited and other State officials told us that having fluency in a host country's language is important for effectively conducting public diplomacy. The foreign government officials with whom we met in Egypt, Morocco, and the United Kingdom agreed. They noted that, even in countries where English is widely understood, speaking the host country's language demonstrates respect for its people and its culture. In Morocco, officers in the public affairs and other sections of the embassy told us that, because their ability to speak Arabic was poor, they conducted most embassy business in French. French is widely used in that country, especially in business and government. However, embassy officers told us that speaking Arabic would provide superior entrée to the Moroccan public. The ability to speak country-specific forms of Arabic and other more obscure dialects would generate even more goodwill, especially outside the major cities.

According to the department, the largest and most significant factor limiting its ability to fill language-designated positions is its long-standing staffing shortfall, which State's Diplomatic Readiness Initiative is designed to fill. Other planned actions include bolstering efforts to recruit job candidates with target language skills, sending language training supervisors to posts to determine ways to improve training offerings, and

⁹Language-designated positions are graded for both speaking and reading proficiency. Most officers who do not meet one requirement do not meet the other one either, so the percentages are similar. For purposes of clarity, our figures refer only to the requirements for speaking proficiency.

¹⁰These are positions for which language capability is preferred but not required.

developing a new “language continuum” plan to guide efforts to meet the need for higher levels of competency in all languages, especially those critical to national security concerns.

Outdated Broadcast Services and Structure Pose Challenges to Expanding in Priority Markets

The Broadcasting Board of Governors has its own set of public diplomacy challenges, key among them is how to achieve large audiences in priority markets while dealing with (1) a collection of outdated and noncompetitive language services, (2) a disparate organizational structure consisting of seven separate broadcast entities and a mix of federal agency and grantee organizations that are managed by a part-time Board of Governors, and (3) the resource challenge of broadcasting in 97 language services to more than 125 broadcast markets worldwide. Although its strategic plan identifies a number of solutions to the competitive challenges the Board faces and provides a new organizational model for U.S. international broadcasting¹¹, we found that the Board’s plan did not include specifics on implementation strategies, resource requirements, project time frames, or a clear vision of the Board’s intended scope-of-operations. The Board recently completed a review of the overlap issue and identified six approaches to addressing the problem while still meeting the discrete missions of the Voice of America and other broadcast entities. All of the Board’s overlapping services were assessed against this analytical framework and over \$9.7 million in potential savings for priority initiatives were identified.

Mr. Chairman, this concludes my prepared statement. I would be happy to respond to any questions you or other members of the subcommittee may have at this time.

Contacts and Acknowledgments

For future contacts regarding this testimony, please call Jess Ford or Diana Glod at (202) 512-4128. Individuals making key contributions to this testimony included Lyric Clark, Janey Cohen, Michael Courts, Melissa Pickworth, Edward Kennedy, and Michael ten Kate.

¹¹The Board views the separate entities as part of a “single system” under the Board’s direct control and authority.

GAO's Mission

The General Accounting Office, the audit, evaluation and investigative arm of Congress, exists to support Congress in meeting its constitutional responsibilities and to help improve the performance and accountability of the federal government for the American people. GAO examines the use of public funds; evaluates federal programs and policies; and provides analyses, recommendations, and other assistance to help Congress make informed oversight, policy, and funding decisions. GAO's commitment to good government is reflected in its core values of accountability, integrity, and reliability.

Obtaining Copies of GAO Reports and Testimony

The fastest and easiest way to obtain copies of GAO documents at no cost is through the Internet. GAO's Web site (www.gao.gov) contains abstracts and full-text files of current reports and testimony and an expanding archive of older products. The Web site features a search engine to help you locate documents using key words and phrases. You can print these documents in their entirety, including charts and other graphics.

Each day, GAO issues a list of newly released reports, testimony, and correspondence. GAO posts this list, known as "Today's Reports," on its Web site daily. The list contains links to the full-text document files. To have GAO e-mail this list to you every afternoon, go to www.gao.gov and select "Subscribe to e-mail alerts" under the "Order GAO Products" heading.

Order by Mail or Phone

The first copy of each printed report is free. Additional copies are \$2 each. A check or money order should be made out to the Superintendent of Documents. GAO also accepts VISA and Mastercard. Orders for 100 or more copies mailed to a single address are discounted 25 percent. Orders should be sent to:

U.S. General Accounting Office
441 G Street NW, Room LM
Washington, D.C. 20548

To order by Phone: Voice: (202) 512-6000
 TDD: (202) 512-2537
 Fax: (202) 512-6061
